

ATTENTION YOUNG PROFESSIONALS!

The 2021 Young Professionals e-Forum is fast approaching. Win a full registration to EcoForum 2021 – Sydney 19-21 October

Once again, ACLCA SA is putting the spotlight on the young professionals in our industry via the annual Young Professionals forum. This is an opportunity whereby YPs from member companies have the opportunity to present a short seminar on a topic from the abstract options (overleaf) relevant to the site contamination industry.

How do you get involved?

- If you are a site contamination consultant working at an ACLCA member company and have professional experience spanning 7 years or less, you are eligible and encouraged to enter.
- Prepare an abstract (≤250 words) for your proposed presentation and submit it via email to sa@aclca.com.au – **Submissions close 5pm Friday 2 July**. Abstract topics are overleaf.
- Abstracts, which must be your own work, will be reviewed by a judging panel and three finalists will be selected to provide an online presentation (via Zoom) **Thursday 29 July**. Finalists will be notified by **COB Friday 9 July**.
- The judging panel will assess the presentations provided during the online YP Forum and select the best presenter of the day – The judges' decision will be final.
- If you are a finalist, prepare your presentation for the online YP Forum – you'll have 15 minutes to present + 5 minutes for Q&A.

Prizes

- 1st prize – Full registration to attend EcoForum conference either in person or virtually.

A live Q&A session will also be held where state winners can be involved together and there may be the opportunity if time permits to present again.

- 2nd prize - \$200 gift voucher
- 3rd prize - \$100 gift voucher

More about the online YP Forum

Due to social distancing limitations, the forum this year will be held online via Zoom. Finalists will need to be comfortable with presenting via this option. The aim of this forum is to:

- provide an opportunity for YPs to present to their industry peers and gain valuable experience in public speaking and technical presenting
- showcase the talents and innovation of YPs in South Australia
- encourage more YPs to participate in ACLCA activities
- this session will be recorded and made available at a later date to member companies and participants

Testimonial

“Presenting at both ACLCA SA YP event and also at EcoForum was a massive accomplishment for me this year and was really helpful in both my personal development and career development. Additionally having to present at both events as well as practice runs in the office helped me gain confidence with presenting at conferences and public speaking” Josh Edwards (Kleinfelder) – 2020 ACLCA SA YP EcoForum Presentation Winner

EcoForum Abstract topics *(from 2020 as a guide)*

Contaminated Site Investigation and Risk Assessment

- Current state of the art and best practice for site investigation and risk assessment methodologies
- Working in difficult lithologies such as fractured rock
- High resolution site investigation
- Vapour intrusion and landfill gas
- Groundwater and water surface interactions
- Sediment investigations and assessment
- Dealing with uncertainty in conceptual site models
- Fate and transport

Contaminated Site Remediation, Rehabilitation and Case Studies

- Contaminated soil reuse and disposal
- Innovative & smart solutions for land and contamination management
- Advances in remediation technologies
- Future trends that may influence remediation technologies and solutions
- Managing legacy sites & regeneration projects
- Managing existing & future liabilities
- Post treatment monitoring & site management
